PROJECT SPOTLIGHT

CHRISTIAN INVESTORS FINANCIAL

CIF | Financial Services on a Mission

Q: Tell us about Christian Investors Financial's relationship with High Point Networks.
A: Christian Investors Financial began working with High Point Networks in early 2019. I worked extensively with High Point Networks at a previous company and knew firsthand the benefits of working with a trusted partner.

Q: Describe the project you implemented with High Point Networks.
A: Christian Investors Financial had been utilizing the network and server infrastructure graciously made available by another company in our building. With High Point Network's assistance, we implemented our own network and server environment. We also deployed robust disaster recovery solutions for

INTERVIEWEE: Jason Goudy
TITLE: IT Manager
PROJECT: Infrastructure & Managed Services
COMPANY LOCATION: Bloomington, MN

our Microsoft 365 platform and VMware server infrastructure.

Q: What challenge(s) did the solution you implemented solve?
A: Implementing our own network and server environment has allowed Christian Investors Financial the flexibility to quickly respond to ever-evolving technological needs and trends. The technology implemented during this project has allowed us to operate easily during the uncertainties surrounding Covid-19.

Q: How did having a project manager specifically assigned to your company help streamline your project?
A: The project manager coordinated all aspects of the project and became the "go-to" person for our questions and concerns. Instead of having to deal with multiple individuals, each having his/her area of expertise, the project manager directed and scheduled all the tasks and kept us informed throughout the project.

Q: What is an example of how High Point Networks has went "the extra mile" to serve you during this project?
A: During the Friday evening of our

infrastructure implementation, High Point Networks personnel worked late into the night, both onsite and remotely, to ensure a successful migration. Over that weekend, High Point Networks personnel continued troubleshooting any issues that arose; thus, ensuring business continued as normal Monday morning.

Q: What have been the greatest benefits of working with HPN as your trusted IT partner?
A: Knowing we have an organization ready to help us with any current or future technology needs.

Services Implemented

FIREWALL AS A SERVICE
(FWaaS)

NETWORK AS A SERVICE
(NaaS)

DISASTER RECOVERY AS A SERVICE
(DRaaS)
