

PROJECT SPOTLIGHT

WELD COUNTY SCHOOLS

Q: Tell us about Weld County Schools relationship with High Point Networks.

A: We have a very close relationship with High Point Networks. Over the past 5 years we have gotten to know both Elmar Cannon and Patrick Fowler quite well out here.

Q: Describe the project you implemented with High Point Networks.

A: With closures due to COVID-19, we were immediately forced to think quickly on ways to help our teachers implement remote learning, contacting students and their guardians, all while maintaining security throughout. One thing that was severely lacking and behind the times was our Active Directory structure. By

INTERVIEWEE: Ashley Bell

TITLE: Director of Technology

PROJECT: Microsoft Intune

COMPANY LOCATION: Keenesburg, CO

implementing Microsoft Intune, getting the district pushed into a more modern and remote infrastructure has been key in managing teacher’s devices when they are at home.

Q: What challenge(s) did the solution you implemented solve?

A: We went from a standard localized Active Directory to being able to quickly manage devices on the fly, no matter where our staff was physically located.

Q: How did having a project manager specifically assigned to your company help streamline your project?

A: Our project manager, Shane Bryn, took the time to communicate effectively and asked all the proper questions on what we were looking to get done. This helped the team focus on exactly what needed to be done quickly, so that we could get the solution implemented as fast as possible.

Q: What is an example of how High Point Networks went “the extra mile” to serve you during this project?

A: The engineering team of Chris Perry and Brady Nelson was fantastic. Initially, we had issues with a few of the software packages and they took the time to test and retest these packages so that we could get them running to meet our needs.

Q: What have been the greatest benefits of working with HPN as your trusted IT partner?

A: We know we can always count on the folks at High Point Networks to have our back.

“It’s hard to find honest sales teams and effective subject matter experts all in one place. With High Point Networks, we know we have all of that and more”

Intune for Education

Intune for Education is a solution designed specifically to manage and connect education technology

Simple and powerful

Intune for Education provides a simple way to deploy and manage a range of powerful Windows 10 devices and applications that meet classroom needs and unleash student capabilities.

Connected and future-ready

Intune for Education, integrated with School Data Sync, Teams, and OneNote, work together seamlessly so teachers can unlock students’ creativity and prepare them for the future.
